Thank you for choosing to download our Kverneland Taarup 4028 mower for Farming Simulator 2011. To get best enjoyment, we recommend you read on; most of your potential questions may be answered below.

4028 Mower Conditioner

Mower Specs

Working width	2.8m or 9' 2"
Minimum PTO requirement	70hp
Transport width	2.85m or 9' 4"
Weight	1480kg

Attaching the mower

Attach the mower using the "Q" key on your keyboard. Remember, you must also attach the PTO shaft – simply exit the tractor and stand next to the PTO as shown (right). Press "Q" to attach.

The mower will not operate without the PTO attached; you will receive the message shown (left)

Changing to field position

To change to field position, you must exit your tractor and fold down the side skirts. To do this, stand next to the mower and press "X"

Transport Position

*Press "X" for
Field Position*

Now the skirts are down, return to the tractor and rotate the drawbar to field position. To do this, press X. Note, if the skirts are not down, you will receive the following message.

Adjusting the Conditioner

The grass from the mower can be placed in swathes or mowed out flat. Exit the tractor and stand at the rear of the mower. Press “O” to make the adjustment.

Doors closed, grass will be placed in swathes

Doors open, grass will be mowed out flat

Area Counter

For your convenience, the mower is equipped with a mowed area counter – press “Delete” to display it. The area is displayed in both hectares and acres.
